

*GRADES 6-8:*

*While each grade level focuses on reinforcing and expanding the skills they learned in previous years, students also learn new skills such as using and creating spreadsheet, formulas and graphs in Microsoft Excel. They also learn to evaluate websites to find accurate information, and how to integrate internet search results into research projects. Grades 7 and 8 learn Google Sketch-up to create 3D objects. Microsoft Publisher is used to create cards, posters, newsletters, and labels. A strong emphasis is given on cyber bullying, internet safety, and copy right laws.*
